

Dear _____,

As a physician, you are well aware of the harm that carcinogens can cause the human body. Like tobacco, asbestos has been recognized as a deadly carcinogen for more than thirty years. Recently, Acting US Surgeon General, Steven K. Galson, released a statement officially recognizing the dangers of this natural fiber by stating that “there is no level of asbestos exposure that is known to be safe and minimizing your exposure will minimize your risk of developing asbestos-related disease.”

As you know, asbestos related diseases can develop decades after minimal exposure occurs. Asbestos has been proven to cause lung cancer and mesothelioma, along with numerous other asbestos-related diseases. Recently, the International Agency for Research on Cancer noted sufficient evidence that asbestos causes ovarian cancer and reconfirmed asbestos causes laryngeal cancer. As such, it is imperative that we act and act quickly.

There is no better way to support this cause than by joining the Asbestos Disease Awareness Organization (ADAO) at the 6th Annual Asbestos Awareness Conference in Chicago, April 9 - 11, 2010. This event will be filled with opportunities to learn more about asbestos-related diseases, treatments for such diseases, and information on the support network of volunteers that ADAO has to offer.

I present this letter to you as a request for your support in this cause by visiting the Asbestos Disease Awareness Organization’s website, www.AsbestosDiseaseAwareness.org. I’m confident that as you learn more about the terrible harm that asbestos-related diseases cause your patients and their families, that you will fully support me and ADAO in our fight to ban this deadly fiber.

The only way to save the lives of tens of thousands of unknowing victims is to successfully ban the use of asbestos in all its forms and uses once and for all. By joining together in this effort, we will succeed in a full ban of asbestos. Please join us by visiting ADAO on the Internet.

Sincerely,
